

Flag Visual Ear Tag Large

ALPHA LINE

Product Description

This visual tag guarantees security, usability and high retention. Its special design allows a rapid wound heal as well as less abrasion of the animal's ear skin. This single use tag has a tamperproof closing mechanism coupled with a hard plastic black cap. Any tentative to separate the male tag from the female would damage both parts making the product impossible to be re-used.

These characteristics make this tag ideal for official identification programs as well as herd management.

Tag numbers and barcode are laser marked as per customer indication with a black durable contrast.

Product available in a wide range of colors.

Technical Specifications

Product Name	F9S
Size and Weight	W 57x L 77 mm, 6.3 g
Material	Polyurethane
Certifications	ICAR Approved
